

Gryffin Croctop Topping

High Security Fence Topper

GRYFFIN
HIGH SECURITY FENCING & GATES
Smarter solutions, guaranteed.

Design

CrocTop® Spiked Fence Toppings have been designed as a low cost option for deterring would be intruders from climbing over a fence or barrier. CrocTop® is machine punched to form a 25mm high triangular spike. CrocTop® is available in 2.4m lengths of flat strip or angle to suit most applications. Barbed tape toppings can also be added onto CrocTop®. Barbed tapes can be fixed at variable spacings as required.

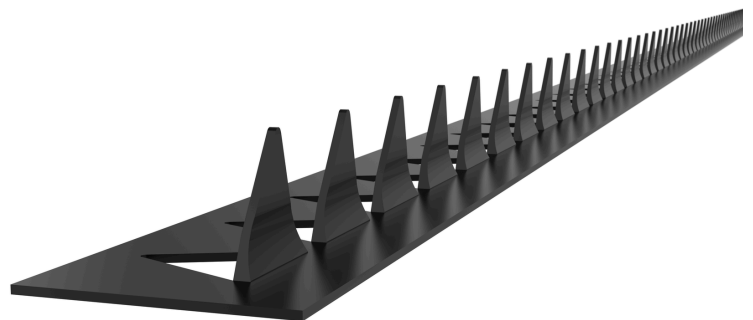

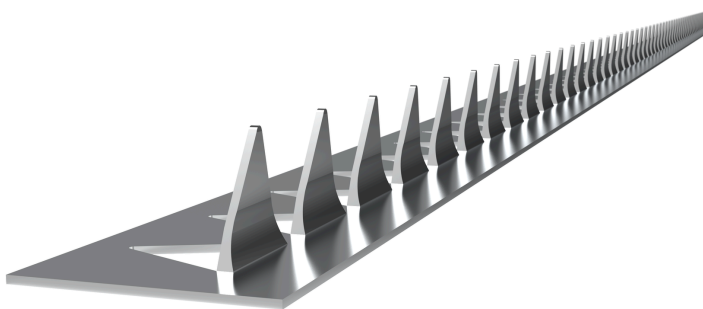

CrocTop® Fence Toppings maintain security to the edge of mesh fencing system as they prevent the mesh sheets from being removed. Securemax® mesh panels can be raked to suit site conditions using the CrocTop® Spiked Fence Toppings.

Performance & Durability

All CrocTop spikes can be retrofitted to brick walls, colorbond fencing, chainwire fences and can be used in conjunction with Securemax 358, Corromesh 358 and a wide variety of other fencing systems.

Appropriate Standards

CrocTop Spiked Fence Toppings galvanising process is AS / NZS 4680-2006 ensuring a quality, long term surface finish.

Recommended Fixings

Recommended fastenings of croctop topping is a simple roofing/tek screw application ranging from 20mm to 50mm screws in both regular GAL or PC finish.

Finishes

Croctop is available in a standard pre-gal finish (most common application), however, it is also available in a wide variety of RAL PC colours to suit colorbond fencing.
